Re-registration in new academic year

On 15 Jul every year the DTS needs to show a popup to all school users with a click button asking to re-register for next year.

Once they say yes, the DTS for the School re-registers on 01 Aug. After logging in on and after 01 Aug.
- On Runners page, All the Runners are hidden. In the background only school distance and milestones resets to 0 while Park distance and milestones continuous with new distances added on top of existing.
- On Summary page, the default year changes to new year (this year it would be 2021-2022) and all data and graph resets to zero.
- On Runs page, all the previous runs gets hidden and clean slate to add new Runs.
- On the Courses page, presently all the old courses gets reset to a clean slate. They can remain too.
- Pop up comes to to upload new CSV for the new academic year.
- On uploading the new CSV file, the DTS compares newly uploaded runners with previous existing runners and
  - For all runners existing previously, updates their Reg Group and Year Group as per newly uploaded CSV.
  - For all newly first time uploaded runners, add then to the list.
  - After 01 Jun, Delete any runners that were existing previously but not uploaded with new CSV.
